

PROVIDING  
SOLUTIONS FOR  
YOUR BUSINESS.

**TIME & RESOURCE MANAGEMENT (TRM)**

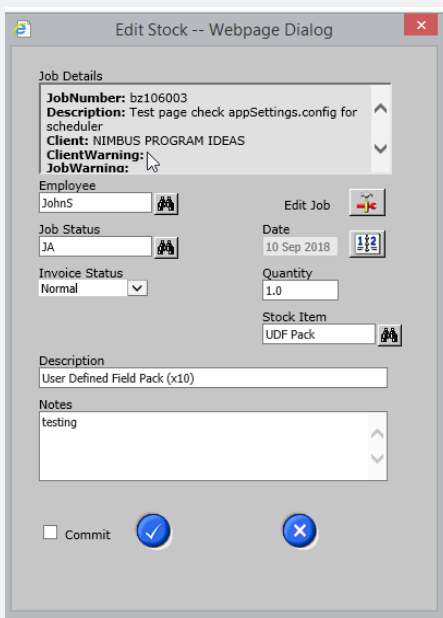

## Overview

TRM (Time and Resource Management), is designed to be accessed from a web browser to allow Time, Expenses and Stock to be entered into Nimbus Optimum via either Job Costs or Scheduler and allocated or posted to a selected employee on a selected job.

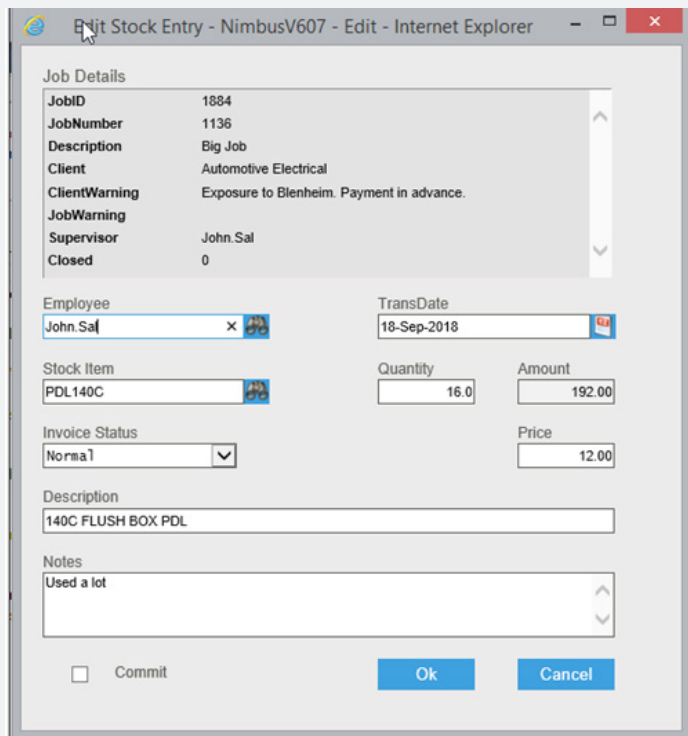

TRM can be customised to add and remove fields to match a particular client's needs.

Additionally, we have updated TRM to support new technologies and modern browsers such as Chrome. This has been done to future-proof Nimbus Optimum and keep it in line with best practice.

## Functionality

Old TRM data entry screen.

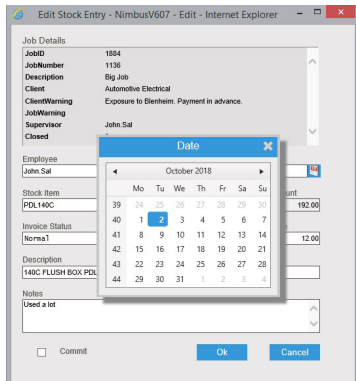

New TRM data entry screen.

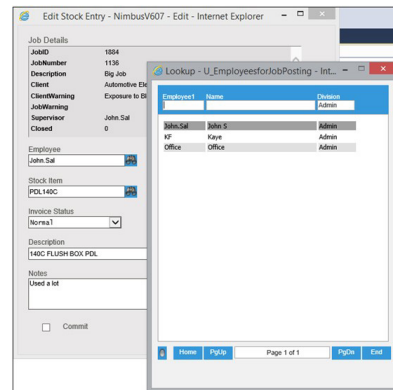

## Functionality (cont.)

### New Time Entry

Allows you to add time items to the job. This results in time items being added to the list of costs on the job.

Example of updated date widget.

Example of an updated look up which predictively narrows the search as information is typed.

### New Resources Entry

Allows you to add resource type items to the job. This results in the items being added to the list of costs on the job.

### New Expense Entry

Allows you to add non-stock type items to the job. This results in the items being added to the list of costs on the job.

### Editing of Entries

Allows you to edit time, resources and non-stock items to the job. This results in costs on the job being updated.

### Job Invoice Creation

Allows you to manage payments to the job on an invoice-by-invoice basis.

## Technology

- **Supports Chrome browser**  
By supporting Google Chrome, Nimbus is future proofing your investment.
- **Fast reporting**  
Advances in browser technology means using Chrome results in a much improved reporting speed.
- **Updated intranet**  
By continually updating the intranet Nimbus is not only protecting your investment, it is ensuring it can take advantage of technology change as they come along.
- **New look and feel**  
A consistent approach to the look and feel of all screens. Clean and simple.
